Dear Sirs:

I really wish our US Government would accept decisions as they stand instead of dragging suits out years and years and millions and millions of dollars being wasted. A decision was reached.....let's get on with it! The Federal Government and 9 states agreed. Let Microsoft "pay" its reduced liability and let's get on with life! Having been a senior officer in a publically traded company for 20 years, I personally know that a company can't plan anything until it truly knows where it stands. Think of the inefficiencies not to mention the cost! When is our legal system going to get into the 21st Century and quit practicing "Guilty until proven innocent"!!!!!!! Bob Burress.
